

Does you like to “reach out and touch someone” by phone. You can thank Alexander Graham Bell! Bell was born in scotland on March 3 1847. When he was a boy, he designs a machine that cleaned wheat. Later when he was a teacher of the def, Bell developed the idea of “electronic speech.” He sent his first message to his assistant, Mr. Watson, who was in the next room always an inventor, Bells house even had simple air conditioning!
